## **DETAILED ACTION**

This first Office Action is in response to Applicant's originally filed application received in the Office on July 24, 2003 in this case.

### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on March 22, 2004 was in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

### ***Claim Objections***

Claims 1-5 are objected to because Applicant is clearly attempting to claim an "article enabling a spray bottle to be suspended" and not the bottle. The figures are consistent with this interpretation. Applicant has, however, recited a number of features of the bottle including, in claim 3, describing the "curved back surface" with respect to the trigger of the bottle. No weight has been given to the features of the bottle in the rejections below.

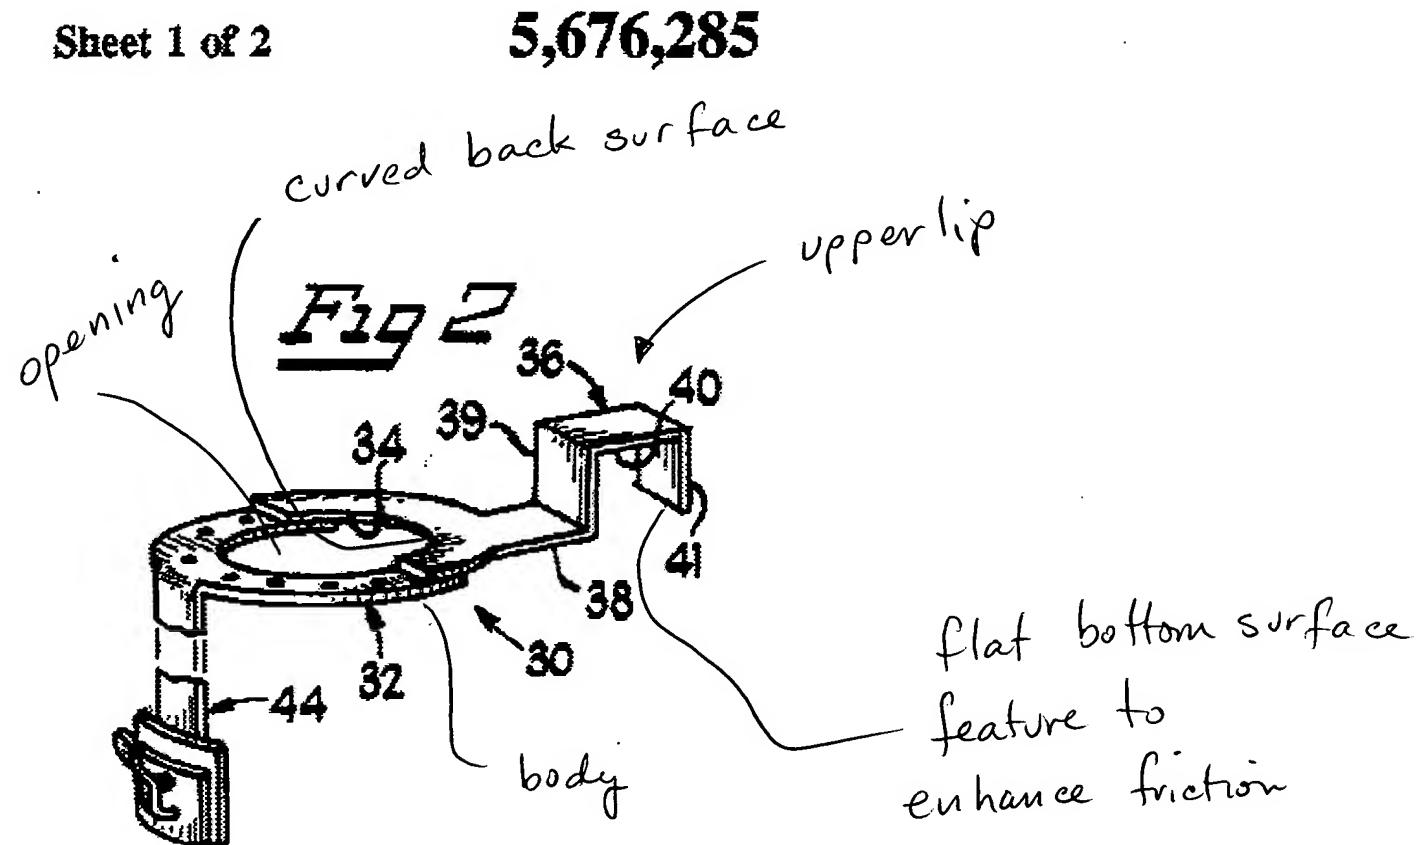

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Vinarsky (5,676,285). Vinarsky teaches each feature as shown below.

**Prior Pertinent Art**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. '037 to Hamann; '815 to Blanchester and '857 to Green. Each of the foregoing references teaches a hook support for a bottle hung around the neck of the bottle.
